ACTIVITY INFORMATION

Course Description

For the 27th year, the Cedars-Sinai International Endoscopy Symposium will offer an intensive and comprehensive review of pancreatic and biliary endoscopy for the benefit of gastroenterologists, gastroenterology fellows, and gastroenterology nurses and technicians. Invited expert faculty will perform multiple live luminal endoscopy, EUS and ERCP procedures to demonstrate techniques and technology.

The 2020 symposium opens with the 4th Advanced Luminal Endoscopy Course with live procedure demonstrations on Thursday and presentations covering endoscopic interventions for IBD and esophageal conditions, innovations in endoscopy, and endoscopic closure and stapling content. The Friday program offers a mini-symposium on radiation safety and fluoroscopy in the morning, with a concurrent session that will reinforce skills and offer more personalized educational content in hands-on workshops designed for GI Fellows and GI nurses. On Friday afternoon, the 27th International Biliary Symposium on Pancreatic & Biliary Endoscopy kicks off with a literature review and exploration of novel techniques and devices, followed by multiple live ERCP and EUS demonstrations from the Cedars-Sinai GI Unit.
